Open Hardware Camp 2012

2nd Open Source Hardware Camp
15-16 September 2012, Hebden Bridge, Yorkshire

Following the success of the inaugural event, the 2nd Open Source Hardware Camp will be a weekend affair, with nine workshops on the first day:

This event is organised by our friends the

Open Source Hardware Group

The Saturday workshops:

- Practical Experiences with the Google Android Accessory Development Kit
- The Internet of Things and Arduino
- Developing Linux on Embedded Device
- Interfacing the Raspberry Pi to the World — Everything you need to know about P1
- Sensing Wearable Technology
- The Bots are Coming
- DIYBIO - The Next Frontier
- Running OpenBTS in the Real World
- The 3D Printed Revolution

and on Sunday a series of informal workshops shaped by the participants. (So details are subject to change depending upon the level of interest expressed.)

The 2nd Open Source Hardware Camp will take place place in the north of England in the Pennine town of Hebden Bridge.

Building on the success of last year's OSHCamp, it will be a weekend long event with nine talks on the Saturday and four parallel workshops on the Sunday.

Hebden Bridge is approximately 1 hour by rail from Leeds and Manchester. Budget accommodation is available at the Hebden Bridge Hostel which adjoins the venue. (Discounts are available for group bookings).

Only £11.25 to attend, please register and share on Lanyrd.
